Doctor James A. Shannon  
Director  
National Institutes of Health  
Bethesda, Maryland

Dear Doctor Shannon:

A good friend of mine who is doctoring for a chronic infected sinus condition has been advised that X-ray treatments may prove to be beneficial.

Will you please advise me whether, in your opinion, such treatment has proved to be beneficial, and also what progress appears to have been made in research for conditions such as this?

With warm personal regards, I am,

Sincerely yours,

John E. Fogarty, M. C.
